## PROFESSIONAL PROFILE

**Backend & Cloud Engineer** focused on scalable systems, automation, and production environments. Experienced in Java/Spring Boot development, cloud deployments, ERP integrations, and process optimization.

## PROFESSIONAL EXPERIENCE

**IT Lead / Backend Engineer – SieteIdeas** August 2025 – Present | Argentina (Hybrid)

- **Led technical implementations and coordinated IT** processes across multiple business operations.
- **Developed backend systems** using Java, Spring Boot, REST APIs, JWT security, and SQL persistence.
- **Managed end-to-end Odoo ERP implementations**, including migration, validation, deployment, and production go-live.
- **Executed cloud deployments and production system migrations**, ensuring operational stability and high availability.
- **Automated operational workflows** using Python, Bash scripting, and AI-assisted processes to reduce repetitive manual tasks.
- **Worked with Linux** environments, backend infrastructure integration, and deployment configurations.
- **Managed agile** delivery cycles using Jira, Git, and Scrum methodologies.

### Business Impact:

- Reduction of manual tasks: **60%–80%**.
- Improvement in implementation times: **40%–60%**.
- Reduction in post-release incidents: **25%–40%**.
- Sustained operational availability: **>99%**.

**Java Backend Developer – Sistema Integrado de Salud Pública Tandil (S.I.S.P)** March 2025 – August 2025 | Argentina (On-site)

- **Developed and maintained REST APIs** using Java and Spring Boot.
- **Optimized SQL** queries and improved performance for critical healthcare services.
- Collaborated across the full **software development lifecycle (SDLC)**, including testing, documentation, and deployment processes.
- **Worked with Git, Jira, and agile methodologies** in production environments.

### Business Impact:

- Performance improvement in critical queries: **20%–40%**.
- Latency reduction in endpoints: **15%–30%**.

## EDUCATION & CERTIFICATIONS

- **Systems Engineer** – UNICEN (2021–2026)
- **IBM DevOps Engineering Professional Certificate** (In Progress)
- **Spring Boot & Angular** – Fullstack Development
- **Scrum Fundamentals Certified (SFC)**

## KEY SKILLS

**Technical:** Java, Spring Boot, REST APIs, AI Workflow Automation, JWT, SQL, PostgreSQL, MySQL/MariaDB, ERP Technical Implementations, Docker, Cloud Deployment, Python Automation. **Methodologies & Tools:** Scrum, Jira, Git, Technical Documentation.

## LANGUAGES

- **Spanish:** Native.
- **English:** Intermediate.
